---

Good morning Scott , reference Hbt Airport Roundabout for which comment by 16/10/17, shortly after my return from O/S - I would still wish to add 3 comments . 1 By virtue of 7 Mile Beach link there are some additional 2000 movements which I hope are in current modelling .2 Does the modelling take into account the provision for the movement to the North via a potential link by passing Cambridge /Richmond to Brighton Hub .(Minister Hidding acknowledged this potential ) 3 . Does the low level waterfront land get considered as a corridor for 4 new lanes to service the first causeway (An opportunity to keep road traffic further North of any future Runway extension ) . That land was for sale and obviously has height limits . Regards Chris Merridew 0419 252918 .
