Submission to Legislative Council Sessional Committee Government Administration A -Sub-Committee - Fin Fish Farming in Tasmania Inquiry

Dear Mr Wright

I am a surfer, sup paddler and general ocean lover who feels very priveleged to be able to enjoy the pristine Tasmanian water. I want Tasmanian children to be able to continue to enjoy this privelege. I have seen the Chanel undergo massive changes and all life drained from this environment .

I feel that the sight of fish farms in our waterways does not fit in with our clean green promotion of Tasmania. I am upset that the government dismisses scientific evidence and choose financial gain over protecting our environment - sustainability would be worth considering! Surely it's a no brainer.

I endorse the following recommendations by the Tasmanian Conservation Trust 1. Complete independent water quality and environmental studies, before any environmental licences are issued (not an “adaptive management” approach)., 2. Environmental licences must set a hard cap on biomass and dissolved nitrogen and other pollutants emitted into our waterways from pens, hatcheries and other infrastructure., 3. Require all licences and licence amendments (marine and land based) to be referred to the EPA board so that the community can have a say., 4. Commission an independent review of the Marine Farming Planning Review Panel, focusing on its membership, governance and ties to industry., 5. Improve transparency and enforcement by prosecuting fish escapes, fish kills, marine debris and seal and cetacean interactions., 6. Mandate public reporting for disease outbreaks and other bio-security incidents., 7. Amend the Marine Farming Planning Act to require valuation and protection of social, recreational and visual amenity; and consideration of noise impacts on surrounding residents.

Thank you for reviewing my submission  
Yours Sincerely  
Jane Griggs
