To the Tasmanian Legislative Council,

- Re finfish regulations.
- Your position on salmon farming and your in bed status with the companies that are producing this dangerous food [I assume you know farmed salmon cannot turn pink/orange because of the stress of their environment so they are dyed with chemicals in the food prior to harvest- hmm, yum yum?]leaves your government exposed as corrupt and not the slightest bit interested in the welfare of your citizens whom you are meant to represent- the people who decide whether you get the job of MP. and who pay your wages. You are shameful in regard to your regulation of the poisonous fish farming industry.
