- (7) Agrees that we have the opportunity to innovate and clean up our supply chains, to eradicate elements of exploitation, and to re-create a sustainable Tasmanian economy. (30 April 2020)

- (1) Notes Tasmania's public forests belong to the people of Tasmania.
- (2) Acknowledges the leatherwood tree is found nowhere else in the world but Tasmania.
- (3) Recognises as the climate heats, vegetation dries out and fire becomes more prevalent in the landscape, with burnt rainforest or wet sclerophyll areas regenerating as dry sclerophyll.
- (4) Understands that the 2019 bushfires caused significant loss of leatherwood, severely impacting Tasmanian honey producers.
- (5) Further acknowledges that as a result of those bushfires, Sustainable Timber Tasmania (STT) signed an Memorandum of Understanding with beekeepers to protect significant leatherwood coupes from logging.
- (6) Further notes that Smithton apiarist, Rodney Smith, has had his honey resource and ongoing income impacted by the logging in coupe ME008B, which has continued despite the MOU signed by STT.
- (7) Accepts that for the leatherwood honey industry to continue in warming climate and drying landscape, it needs the support of government and access to a secure, standing leatherwood forest resource.
- (8) Calls on the Minister for Resources and Primary Industries to not only recommit to the MOU with beekeepers to protect Tasmania's finite and dwindling leatherwood resource, but expand that to include an agreement not to burn logged coupes that contain any leatherwood. (6 May 2020)

- (1) Notes Tasmania has the renewable and dispatchable energy the rest of the nation needs, and the Hodgman Liberal Government is committed to using this advantage to ensure all Tasmanians benefit.
- (2) Records this Governments continuing drive for the development of the Battery of the Nation and the crucial second interconnector, the Marinus project, which have the potential to inject up to \$5 billion into the Tasmanian economy and deliver 2,000 jobs, particularly into regional areas.
- (3) Further notes that the development stage of the first phase of the Battery of the Nation carries the commitment of the Federal Government through the Federal Underwriting New Generation Investment program.
- (4) Further notes that support by both the Hodgman Liberal Government and the Federal Government, gives UPC Renewables and AC energy, more confidence to develop their Robbins Island and Jims Plain wind and solar parks.
- (5) Recognises that Tasmania has a world-class wind resource complemented by our pumped hydro that means there will always be some electricity available for export when the mainland is experiencing low wind or high demand.

NOTICES OF MOTION AND ORDERS

- (7) Commends the Hodgman Liberal Government for its strong commitment to making use of the natural resources available to the State while at the same time ensuring all Tasmanians will have access to low cost, reliable and clean energy in their homes and businesses. (Mrs *Rylah*)

To which the following amendment has been proposed by Dr *Woodruff*, by leaving out all words after “That the House:-” and inserting instead:

- “(1) Notes that the Liberals repeatedly talk about the Marinus project and use it as a political wedge, particularly during election periods, despite the fact that they have not put forward a financing proposal or a position on who should finance the multi-billion project.
- (2) Agrees that the project could cost in excess of current total Public Non-Financial Corporations Sector debt, and feasibility studies and prominent economists such as Saul Eslake have raised serious concerns about the viability of the project, which have not been addressed by the State Government.
- (3) Notes that the Liberals passed legislation to set wholesale electricity prices at a rate higher than projected, leading to energy bills decreasing by less than they would otherwise would have.
- (4) Notes with alarm that the Liberal Government continues to allow Entura to engage in profiteering from immoral projects overseas such as the Karuma hydro power project Uganda, which has been linked to killings and other human rights violations.
- (5) Condemns the Liberal Government for their lack of honesty, ethics or plan in their handling of the Energy portfolio.” (Next Speaker: Minister for Energy)
